EXPERIENCE

V9 Group

2020 - May 2026

Web application development

České Budějovice (ČR)

- Developed and maintained web applications and backend systems using *PHP (Laravel)* and frontend applications using *Angular*. Designed and implemented customer, partner, and administrative portals supporting service management and internal operations. Integrated payment solutions, including virtual payment terminals and PayLinks, and contributed to the development of transaction processing systems. Developed onboarding platforms for the registration and management of new clients and business partners.

Ontoast Ltd.

2018 - 2020

Web application development

Manchester (UK)

- Worked as a PHP developer, focusing on the development and maintenance of web applications ranging from *Laravel* and *WordPress* to *Symfony*. Throughout this period, I continuously expanded my skills and experience, while gradually shifting my focus toward JavaScript-based technologies.

Webpagesoftware Ltd.

December 2016 - November 2018

Web application development

České Budějovice (CZ), Manchester (UK)

- Deepened programming knowledge and technical skills by focusing on mastering the *Laravel* framework while gaining hands-on experience with *October CMS*. During this period, developed strong proficiency with tools such as *Git*, *Composer*, and *NPM*, which became an integral part of the development workflow.

Larx s.r.o

February 2015 - November 2016

PHP Developer & Web application maintenance

České Budějovice, (CZ)

- After graduating, I joined an IT start-up focused on web application development and innovative technologies. I started my career as a software developer and laid the foundation for my future growth and professional development. Started working extensively with PHP and started developing applications based on WordPress CMS. As everything was new to me, I invested significant time into learning HTML/CSS with the SASS preprocessor.

PROFILE

- I am a person who values structure, order, and purpose. I approach my work in a structured and responsible manner. I strive to create clear and sustainable solutions, whether in software development, process improvement, or work organization.
- I am comfortable working independently and in a remote environment. I do not require constant supervision or external motivation, as I rely on personal responsibility, self-discipline, and a professional approach. Punctuality, reliability, and the ability to consistently maintain productivity are qualities I consider fundamental.
- Fairness, integrity, and long-term relationships are important to me, both professionally and personally. I am not someone who frequently changes direction. I prefer long-term cooperation in environments where people share clear goals, respect one another, and work together to achieve meaningful results.
- I am seeking a stable position where I can contribute my experience and continue delivering high-quality work over the long term. I believe that the true value of a senior software developer is not measured by the number of hours spent at a computer, but by reliability, expertise, and the ability to consistently produce high-quality results.
- Simplicity and modesty bring balance, freedom, and joy to my life. I am comfortable in my own company.
